

Project Charter

I. General Information

Project name: Beauty_by_Ladybug Photography Company Network Modernization

II. Project Overview *Describe the product or service of the project, the reason the project was undertaken, and the purpose of the project.*

The Beauty_by_Ladybug Photography Company Network Modernization project is intended to design and plan a secure, reliable, and scalable computer network for the company's main office and photography studio. The current network environment relies on outdated hardware, peer-to-peer networking, and minimal security controls, which limits operational efficiency and creates data security risks.

The purpose of this project is to define a modern network solution that supports centralized data storage, secure communication between locations, shared printing, and future business expansion. This charter formally authorizes the project and grants authority to proceed with detailed planning activities.

III. Project Objectives *Describe the overall objectives of the project and what factors will determine the success of the project.*

The objectives of this project are to:

- Design a centralized and secure network architecture connecting the main office and studio within eight weeks.
- Define server, hardware, and software requirements that support current operations and future growth.
- Establish physical and logical security controls to protect business and customer data.
- Develop an implementation plan that minimizes disruption to daily business operations.

Project success will be measured by stakeholder approval of the network design, security plan, and implementation schedule.

IV. Requirements *Describe the expectations and requirements of the customer, sponsor, and stakeholders.*

Key project requirements include:

- Secure connectivity between the main office and photography studio
- Centralized data storage with controlled access
- Network support for shared and local printers
- Compliance with basic industry security best practices
- Scalability to support additional locations in the future.

V. Business Justification	<i>State the reason this project is needed and what problem or issue the project will resolve. Describe the impacts to the organization if the project is not approved.</i> This project is required to support Beauty_by_Ladybug Photography Company's transition to a fully digital business model. Without modernization, the organization faces increased security risks, inefficiencies, potential data loss, and limited scalability. Approval of this project will improve operational efficiency, protect sensitive data, and support long-term business growth.
VI. Resource Costs and Estimates	<i>Provide cost estimates if known, including monies already expended such as a feasibility study or consulting time.</i> At a high level, project costs are expected to include: • Network hardware (servers, switches, routers, firewalls) • Workstation and operating system upgrades • Network cabling and infrastructure • Security software and licensing • Training and testing resources Detailed cost estimates and vendor comparisons will be developed in later planning phases.
VII. Roles and Responsibilities	<i>List the stakeholders and their responsibilities.</i> • Project Sponsor (Owner): Authorizes project and approves major deliverables. • Project Manager: Plans, coordinates, and manages project activities. • IT/Networking Team: Designs network architecture and security controls • Employees: Provide input during requirement gathering.
VIII. Signatures	<i>Include signature lines for the project sponsor, project manager, key stakeholders, customers, and vendors.</i> Name: Tresor Bokole Title: Project Manager Signature: Tresor Bokole
IX. Attachments	<i>List the attachments to the charter here.</i> • Project Concept Document • Project Scope Statement
